## 5<sup>TH</sup> INTERNATIONAL CONFERENCE ON

## ADVANCED TECHNOLOGIES FOR INDUSTRIAL POLLUTION CONTROL (ATIPC-2026) (THROUGH HYBRID MODE)

December 15 – 17, 2026

ORGANIZED BY

Civil Engineering Department  
Indian Institute of Engineering Science and  
Technology, Shibpur  
(Formerly Bengal Engineering and Science  
University, Shibpur)  
Howrah – 711 103  
West Bengal, India

## ABOUT THE CONFERENCE

Industrial processes produce a variety of pollutants in environment, most of which are incompatible for natural stabilization. Ever-increasing concentration of such contaminants severely affects the eco-system. Thus improper waste management of major industries poses a challenge to the environmental sustainability. Beyond the in-plant control measures, several industries are violating the minimal standards for effluent discharge, stack emission and solid waste disposal. Under this circumstance, various advanced technologies need to be innovated, which will ensure efficient waste management practice towards optimum liquid and solid waste discharge as well as minimal emission to the atmosphere. Moreover, it has been a critical issue to all sectors of industries to comply with environmental standard under a competitive business scenario. In order to address the above issues and to search for the innovative technologies in industrial pollution control, the 1<sup>st</sup> to 4<sup>th</sup> International Conference on Advanced Technologies for Industrial Pollution Control (ATIPC – 2018 to ATIPC – 2024) was held between 2018 and 2024 respectively. The present international conference (ATIPC – 2026) is the fifth version of the earlier conferences, which will be held in Hybrid (Online and Offline) mode.

The conference is oriented to create an effective forum for the environmental scientists, engineers, technologist and the industry persons for sharing their research initiatives and real-life experience through oral presentation of the technical papers on relevant focus themes.

## CONFERENCE THEMES

The International Conference (ATIPC-2026) is planned to include the following themes.

- Water quality monitoring and treatment in industrial area
- Industrial effluent treatment, reuse and conservation
- Monitoring of industrial emission and control
- Industrial solid waste management
- Handling and disposal of hazardous waste
- Role of EIA and EMP in industrial pollution control
- Case Studies on industrial pollution control
- Industrial noise control and radioactive waste management
- Innovative technologies in industrial waste management
