

ABOUT THE COURSE

Environmental, Social and Governance (ESG) is a comprehensive framework that takes care at organizational impacts on the environment, the treatment of employees, stakeholders and community members; and also addresses the quality of governance structures. It evaluates business's sustainability and ethical impact. Recent advancements in this area include an increasing focus on data collection and reporting to measure and disclose ESG related performance. The understanding about ESG and sustainability is helpful for small to medium-sized business also. Many of small to medium business, contribute to the supply chain of larger businesses and may require to report and disclose their ESG progress including their supply chain partners. In addition, ESG can provide many benefits to small and medium-sized businesses in managing risks and enhancing their reputation.

The present Certificate course is aimed to deliberate on the important subject areas in the domain of ESG and to enable the professionals competent enough in its real-scale application.
