

Name: **Dr. Debdulal Das**

Father's Name: Late Ambikesh Das

Date of Birth: **August 13, 1973**

Religion: Hinduism

Sex: Male

Marital status: Married

Designation: **Associate Professor**

Department of Metallurgy and Materials Engineering, Indian Institute of Engineering Science and Technology, Shibpur (*Formerly*, Bengal Engineering and Science University, Shibpur), B. Garden, Howrah-711103, West Bengal, India

Address for Communication

Office

Department of Metallurgy and Materials Engineering,
Indian Institute of Engineering Science and Technology, Shibpur
B. Garden, Howrah – 711103,
West Bengal,
India.
Phone: +91 (33) 2668 4561-63 Extn: 473
Fax: +91 (33) 2668 4564/2916

Mobile: +91 7980890165 / 9163547794

E-mail: debdulal_das@metal.iiests.ac.in
debdulal_das@yahoo.com

Residence

Flat: C4, 4th Floor,
Ananya Apartments
18, College Road
B. Garden, Howrah – 711103
West Bengal,
India.
Phone: +91 7980890165

Formal Education

Ph. D.

Bengal Engineering and Science University, Shibpur, 2011
Dissertation: *Structure-Property Correlation of Cryotreated AISI D2 Steel*

M. Tech. (Metallurgical E.)

Indian Institute of Technology, 1997 (CGPA 9.13/10)
Dissertation: *Mathematical Modelling of Mechanical Alloying Kinetics*

B. E. (Metallurgical E.)

Bengal Engineering College, Calcutta University, 1995
(With Honors, Marks: 77.56%)

Award and Recognition

- ✓ **Young Faculty Research Award 2012** by Bengal Engineering College Alumni Association, Washington Metropolitan Area, USA.
- ✓ **G.S. Tendulkar Award 2009** for the **overall Best Oral Presentation** in the Oral Sessions at the 63rd Annual Technical Meeting of the **Indian Institute of Metals** held at Science City, Kolkata during November 16-17, 2009.
- ✓ **Prize in the International Conferences**
 1. **Best Oral Presentation** to **D. Das** for article entitled "*Effect of Deep Cryogenic Treatment on Velocity Dependant Wear Transition of AISI D2 Steel*" in the **Thematic Sessions on Science & Technology of Materials** at the 66th Annual Technical Meeting of the Indian Institute of Metals held at Jamshedpur during November 18-19, 2012.
 2. **Best Oral Presentation** to **D. Das: (Symposium E)** in the 63rd Annual Technical Meeting of the **Indian Institute of Metals**, November 16-17, 2009, Science City, Kolkata, for the paper entitled *Effect of Sub-Zero Treatments on the Mechanical Properties of Die Steel*.
 3. **Best Paper award for Oral Presentation** under **Non-Ferrous category** for the Paper titled "*The role of microstructure on cyclic deformation behaviour of an Al-Mg-Si alloy*" authored by A.P. Sekhar, S. Nandy, K.K. Ray and **D. Das** in the 69th Annual Technical Meeting of the Indian Institute of Metals held at Coimbatore during 13-16th Nov, 2015.
 4. **Second Prize for Oral Presentation** under the category of **Material characterization** for the paper titled "*Microstructure and current-voltage characteristics of erbium oxide doped multicomponent zinc oxide varistors*" authored by S. Roy, T.K. Roy and **D. Das** in the 7th National conference on processing and characterization of materials (NCPCM), held at NIT Rourkela during 8-9th Dec, 2017.
 5. **Best Poster Presentation** award under **Non-Ferrous** category for the paper titled "*Cyclic deformation response of an artificially aged AA6063 alloy*" authored by A.P. Sekhar, S. Nandy, K.K. Ray and **D. Das** in the 72nd Annual Technical Meeting of the Indian Institute of Metals held at Kolkata during 15-16th November, 2018.
- ✓ **The Metallurgical and Materials Engineering Division Medal** by The Institution of Engineers (India) for the **best paper** published in the journal of the Institution for the year **2001**.
- ✓ Selected to participate in the **JSPS-DST Asia Academic Seminar 2009**, Yokohama, Japan and undertake training in advanced materials laboratories in Japan.
- ✓ **Outstanding Contribution in Reviewing of**
 1. **Journal of Alloys and Compounds**, Elsevier, October 2018
 2. **Materials Characterizations**, Elsevier, October 2017
 3. **Transaction Indian Institute of Metals**, Springer, August 2021, October 2021, January 2022, March 2022
- ✓ **Author of The Most Cited Articles** of the following **International Journals**:
 - ◆ **Materials Science and Engineering A, Elsevier Publication**; The article entitled ***Sub-zero treatments of AISI D2 steel: Part I. Microstructure and hardness*** (Vol. 527, Issue 9, 2010, Pages 2182-2193) was in the list of the *Most Cited Articles* of the Journal published from 2010-15.
 - ◆ **Wear, Elsevier Publication**; The article entitled ***Influence of varied cryotreatment on the wear behavior of AISI D2 steel*** (Vol. 266, Issues 1-2, 2009, Pages 297-309) was in the list of the *Most Cited Articles* of the Journal published from 2008 to 2014.

✓ **Reviewer of International Journals (Partial list):**

[Number articles reviewed (*Verified record* in **Web of Science**: **610**; Number of Journals: **76**]

Professional Experience

2000 (December) - Present: Twenty-two years at the **Post Graduate** as well as **Undergraduate** levels in the area of **Metallurgy and Materials Engineering**

Teaching

Under Graduate

1. **Mechanical Testing of Materials (MM3214)**
2. **Physical Metallurgy of Ferrous Alloys (MM2103)**
3. Heat Treatment Technology (*Open Elective*)
4. Deformation Behavior of Materials
5. Phase Transformation
6. Materials Processing
7. Physical Metallurgy

Post Graduate

1. **Mechanical Behavior of Engineering Materials (Open Elective) [MM5161]**
2. **Fundamentals of Materials [MM5101]**
3. **Mechanical Behavior of Materials [MM5202]**
4. **Industrial Metal Working Technology**
5. **Advanced Ferrous Materials**

Research 1997- Present: Twenty Five years

PhD
Dissertation
Guided**
1. **Mr. Aluru Praveen Sekhar: Structure-Property Correlations of Artificially Aged AA6063 Al-Mg-Si alloy; Solo Supervisor, Degree awarded: October 5, 2020.**
 2. **Mr. Santanu Sardar: Tribological Characterization of Stir-Cast AA7075/Al₂O₃ Composites under Two-Body Abrasion: Experiment and Modeling; (as Joint-supervisor; Supervisor: Prof. S. K. Karmakar). Degree awarded: July 19, 2019.**
 3. **Mrs. Tanusree Dutta: Microstructure Quantification and Structure-Property Correlation of Dual-Phase Steels; (Joint supervisor: Prof. S. Dutta). Degree awarded: May 13, 2022.**
 4. **Mrs. Samarpita Roy: Processing-Microstructure-Property Relationships of Er₂O₃ Doped ZnO Based Varistors; (Joint supervisor: Dr. T. K. Roy). Degree awarded: August 10, 2022.**
 5. **Mr. Titov Banerjee: Design and Development of Aluminium Matrix Composites with Improved Performance; (Joint supervisor: Prof. S. Dutta), Thesis submitted: February 18, 2022.**
 6. **Mr. Md. Abu Bakkar: Low Cycle Fatigue Performance of Automobile Grade Steels; Solo Supervisor, Thesis submission: September 2022.**
 7. **Mr. Saroj Kumar Basantia: Cyclic Deformation Behavior of Steels: Experimentation and Simulation; (as Joint-supervisor; Supervisor: Dr. N. Kutia) Tentative Thesis submission: December 2022.**
 8. **Mr. Gaurav Anand: Wire Discharge Machining of Advanced Materials; Registered: September 2020 (as Joint-supervisor; Supervisor: Dr. A. Guha).**
 9. **Mr. Bishal Kanrar: Hot Deformation Behavior of 3rd Generation High Strength Steels, Solo Supervisor, Registered: November 22, 2021.**
 10. **Mr. Sanoj Divakar: Novel Ex-situ Nanoparticle and In-situ Microparticle Reinforced Aluminium Matrix Composites; Solo Supervisor, Enrolled: August 3, 2022**
 11. **Mr. Satish Sah: Surface integrity Characteristics of Advanced Materials Machined by Electrical Discharge Machining; Solo Supervisor, Enrolled: August 4, 2022**

Professional Memberships

- ✓ **Life Member, Indian Institute of Metals (IIM)**
- ✓ **Life Member, Materials Research Society of India (MRSI)**
- ✓ **Life Member, The Institution of Engineers (India)**

Research Areas

Structure-Property Correlation: Establishing qualitative and/or quantitative correlations between microstructure and mechanical property properties of (i) AISI D2 tool steel subjected to various sub-zero treatments, (ii) high-martensitic dual-phase steels developed following different processing routes, (iii) AA6063 Al-alloy age-hardened at different combinations of time and temperature, (iv) rare-earth oxide (Er_2O_3) doped ZnO-based varistor synthesized by powder-metallurgy routes, and (v) in-situ (Al_3Fe) and ex-situ (Al_2O_3) particulate reinforced Al (7075, 2024) alloy matrix composites developed by liquid (*advanced stir-casting*) and solid (*friction stir processing*) state methods.

Tribology: Experimental evaluation of tribological performances (*wear rate/resistance, coefficient of friction and surface roughness*) and their modelling for important engineering materials (*such as die steel, structural steels, dual-phase steels, in-situ and ex-situ particulate reinforced Al-matrix composites*) under various wear situations (*akin to adhesive, two- and three-body abrasion, erosion*) and associated parameters (*e.g., characteristics of counter body, temperature, load, velocity and sliding distance*) with specific emphasize to identify modes (*mild/severe*) as well as micro-mechanisms (*e.g., oxidative, delamination, ploughing, plastic deformation*) of wear, and to establish '*wear mechanism maps*' so as to provide general guidelines for applications of generated materials apart from the development of new wear-resistance materials.

Fatigue: Experimental evaluation and analyses of high cycle fatigue, low cycle fatigue, and ratcheting behavior of various structural steels, reinforcing bars, and Al-alloy at widely different (*e.g., highly under-aged, peak-aged and highly over-aged*) states of artificial ageing. Besides, micromechanical modelling to simulate cyclic plastic behavior with specific emphasizes to understand the role of microstructure (*such as characteristics of second phase/phase mixture in the ferrite-pearlite/bainite/martensite structures*) on cyclic plasticity.

Composite Materials: Manufacturing and characterization of bulk discontinuous particulate reinforced light-metal matrix composites for structural applications. Manufacturing processes include (i) in-situ development of Fe-trialuminide (Al_3Fe) particulate reinforced Al-matrix composite by simple stirring of sacrificial type mild steel plate in the super-heated Al-melt followed by conventional casting; this low-cost novel process is referred to as '*reactive stir-casting*', and (ii) ex-situ production of Al_2O_3 particle reinforced (a) Al7075 matrix composite by advanced stir casting as well as (b) Al2024 matrix composites by friction stir processing (FSP) methods. Characterization includes measurements of hardness (*macro-, micro- and nano-indentations*), tensile, impact and tribological (*scratch, adhesive and abrasive wear*) properties apart from detailed microstructural analyses.

Hot Deformation: Controlled thermo-mechanical processing is the key to achieve desired microstructure and hence, mechanical properties specifically for high-strength low-alloy steels. An a-priori requirement in this direction is to construct '*processing map*' in order to identify the processing windows that in turn, assist in selecting appropriate thermo-mechanical parameters like temperature,

strain rate, and strain. Utilizing experimental true stress - true strain data of hot compression tests over a wide range of temperature and strain rate, the research in this domain at present is directed to identify suitable stability/instability criterion, construct and validate processing map, establish constitutive equations and study the dynamic recrystallization kinetics for (a) nano-precipitation hardened as well as (b) medium-Mn steels.

ZnO-based Varistor: Development of composite like microstructure consisting of semiconducting ultrafine ZnO grains separated by thin insulating intergranular layers in ZnO-based multi-oxides system to produce high-performance varistor with improved energy handing capacity by controlled consolidation of high-energy ball-milled powders through two-stage sintering, and appropriate addition of suitable rare earth oxide (like Er_2O_3) that should act as varistor enhancing dopant, on the one hand, and grain growth inhibitor, on the other hand.

Modelling and Simulation: Research in this domain deals with different aspects of metallurgy and materials engineering such as (i) mathematic modelling to simulate mechanical alloying kinetics, (ii) prediction of yield strength from classical dislocation-particle interactions for age-hardenable Al-alloys, (iii) flow behavior of duplex microstructures through Finite Element Simulations (FEM) based on Representative Volume Elements (RVE) method, (iv) modelling to predict the tribological responses of composite materials via statistical as well as soft computing approaches, and (v) FEM simulation of cyclic plasticity for structural steels.

Non-Traditional machining processes like Abrasive Water Jet Machining, Electrical Discharge Machining, and Wire Electrical Discharge Machining of difficult-to-machine materials (*such as metal- and polymer- matrix composites, martensitic steels, inconel and ceramics*) following design of experiments techniques (*like Taguchi, Response Surface Methodology, Factorial*) to identify influencing factors and to understand as well as to model their roles in material removal rate and characteristics of the machined surfaces (*e.g., surface roughness and dynamic surface modifications like deposition and residual stresses*) apart from multi-objective process optimization (*using Genetic Algorithm, Principal Component Analysis, Grey Relational Analysis, and desirability based approaches*).

Sponsored Research Projects

1. **Project Name: Pilot scale development of abrasion resistance (400 BHN hardness) and advanced high strength (1000 MPa) with superior ductility through HSM**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2020, 2+1 years, On-going; Amount: Rs. 49,53,050.00
Candidate: PI; CI: None
2. **Project Name: Microstructure Quantification and Structure-Property Correlation of Dual-Phase Steels**
Sanctioning Authority: TCS Foundation
Year of Sanction, Duration & Status: 2019-2022, Completed; Amount: Rs. 21,45,000.00
Candidate: PI; CI: None

3. **Project Name: Fatigue study for seismic performance assessment of rebars**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2017, 4 years & Completed; Amount: Rs. 28,81,840.00
Candidate: PI; CI: None
4. **Project Name: Micromechanism of Fatigue Failure of a Few High Strength Grade Steels Produced Through TSCR Route**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2015, 3+1 years & Completed; Amount: Rs. 14,85,961.00
Candidate: PI; CI: None
5. **Project Name: Fatigue Property Evaluation and Microstructural Characterization of Hot Rolled Steels**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2015, 3 years & Completed; Amount: Rs. 14,85,000.00
Candidate: PI; CI: None
6. **Project Name: Wear performance evaluation of high strength microalloyed steels**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2015, 1 year & Completed
Candidate: PI; CI: None
7. **Project Name: Deformation and damage behavior of automobile grade steels under cyclic loading**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2013, 1 year & Completed
Candidate: PI; CI: None
8. **Project Name: Evaluation of fatigue behavior of low C medium Mn steels**
Sanctioning Authority: The Institute of Engineers (India)
Year of Sanction, Duration & Status: 2012, 1 year & Completed
Candidate: PI; CI: None
9. **Project Name: A comparative assessment of fatigue performance and damage mechanisms of directly air-cooled and TMT steel rebars**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2012, 2 years & Completed; Amount: Rs. 7,50,000.00
Candidate: PI; CI: None
10. **Project Name: Evaluation of Performance of Non-TATA Steel Rebars in Concrete for Corrosion and Bond Strength Properties**
Sanctioning Authority: TATA Steel Pvt. Ltd., Jamshedpur
Year of Sanction, Duration & Status: 2006, 3 years & Completed; Amount: Rs. 8,00,000.00
Candidate: One of the two CIs (+ 1 PI)
11. **Project Name: Controlled Deep Cryogenic Treatment of High Speed Steels for Enhancement of Tool Life**
Sanctioning Authority: UGC (Major Project)
Year of Sanction, Duration & Status: 2006, 3 years, Completed; Amount: Rs. 5,82,000.00
Candidate: CI; Others involved: 1 (as PI)
12. **Project Name: Development of Nanocrystalline Al₂O₃ Dispersed Cu-Matrix Composites**
Sanctioning Authority: ISRO (RESPOND Scheme)
Year of Sanction, Duration & Status: 2004, 3 years & Completed; Amount: Rs. 8,25,000.00
Candidate: CI; Others involved: 1 (as PI)
13. **Project Name: Synthesis of Value Added Industrial Component by Sintering of Nanocrystalline Alloys Prepared by Mechanical Alloying**
Sanctioning Authority: The Institution of Engineers (India) [R & D Project]
Year of Sanction, Duration & Status: 2002, 1.5 years & Completed;
Candidate: PI; CI: None

3. **Structure property correlation of Ti, B microalloyed dual phase steels**
Ghosh, S., Das, D., Chattopadhyay, P.P.
Journal of the Institution of Engineers (India), Part MM: Metallurgy and Material Science Division, 82(2) (2001) 50-57.
<https://link.springer.com/journal/40033>
2. **A measure of enhanced diffusion kinetics in mechanical alloying of Cu-18 at.% Al by planetary ball milling**
Das, D., Chattopadhyay, P.P., Manna, I., Pabi, S.K.
Scripta Materialia, 41(8) (1999) 861-866.
DOI: [https://doi.org/10.1016/S1359-6462\(99\)00220-1](https://doi.org/10.1016/S1359-6462(99)00220-1)
<https://www.sciencedirect.com/science/article/pii/S1359646299002201>
1. **Mathematical modelling of the mechanical alloying kinetics**
Pabi, S. K., Das, D., Mahapatra, T.K., Manna, I.
Acta Materialia, 46(10) (1998) 3501-3510.
DOI: [https://doi.org/10.1016/S1359-6454\(98\)00035-4](https://doi.org/10.1016/S1359-6454(98)00035-4)
<https://www.sciencedirect.com/science/article/pii/S1359645498000354>

in Conference Proceedings

31. **Multi-Objective Genetic Algorithm Based Optimization of Age Hardening for AA6063 Alloy**
Sekhar, A.P., Nandy, S., Dey, S., Datta, S., Das, D.

-
- IOP Conference Series: Materials Science and Engineering**, Vol. 912, Issue 5, Page 052019 (6 pages)
DOI: <https://doi.org/10.1088/1757-899X/912/5/052019>
<https://iopscience.iop.org/article/10.1088/1757-899X/912/5/052019/meta>
30. **Low cycle fatigue analysis of ferrite-martensite dual-phase steel using advanced cyclic plasticity models**
Singh, V., Basantia, S.K., Bhattacharya, A., **Das, D.**, Khutia, N.
IOP Conference Series: Materials Science and Engineering, Vol. 377, Issue 1, 2018, Page 012161 (10 pages).
DOI: <https://doi.org/10.1088/1757-899X/377/1/012161>
<https://iopscience.iop.org/article/10.1088/1757-899X/377/1/012161>
29. **Hardness-yield strength relation of Al-Mg-Si alloys**
Sekhar, A.P., Nandy, S., Ray, K.K., **Das, D.**
IOP Conference Series: Materials Science and Engineering, Vol. 338, Issue 1, 2018, Page 012011.
DOI: <https://doi.org/10.1088/1757-899X/338/1/012011>
<https://iopscience.iop.org/article/10.1088/1757-899X/338/1/012011>
28. **Microstructure and current-voltage characteristics of Erbium oxide doped multicomponent Zinc oxide varistors**
Roy, S., Roy, T.K., **Das, D.**
IOP Conference Series: Materials Science and Engineering, Vol. 338, Issue 1, 2018, Page 012046.
DOI: <https://doi.org/10.1088/1757-899X/338/1/012046>
<https://iopscience.iop.org/article/10.1088/1757-899X/338/1/012046>
27. **Effect of isothermal ageing on abrasive wear behavior of Al-Mg-Si alloy**
Sekhar, A.P., Nandy, S., Ray, K.K., **Das, D.**
2nd International Conference on Materials Science and Technology (ICMST 2016), 5-8 June, 2016, Kerala.
26. **Effect of Er₂O₃ addition on densification characteristics of nanocrystalline ZnO based varistors**
Roy, S., **Das, D.**, Roy, T.K.
2nd International Conference on Materials Science and Technology (ICMST 2016), 5-8 June, 2016, Kerala.
25. **Noise removal and image segmentation in micrographs of ferrite-martensite dual-phase steel**
Dutta, T., Banerjee, S., Saha, S.K., **Das, D.**, Datta, S.
DEStech Transactions, 2017 Asia-Pacific Engineering and Technology Conference (APETC 2017) ISBN: 978-1-60595-443-1; pp. 638-646; DOI 10.12783/dtetr/apetc2017/11061
24. **Cyclic plasticity modeling to predict LCF characteristics of dual-phase steel**
Basantia, S.K., Singh, R.V., **Das, D.**, Khutia, N.
Proceedings of Research Scholars Colloquium 2016 (ISBN: 978-93-80813-44-8), Pages 102-103, 23-24 August, 2016, IEST Shibpur, India.
23. **Yield strength modeling of an Al-Mg-Si alloy**
Sekhar, A.P., Ray, K.K., **Das, D.**
Proceedings of Research Scholars Colloquium 2016 (ISBN: 978-93-80813-44-8), Pages 159-160, 23-24 August, 2016, IEST Shibpur, India.
22. **Development of high performance ZnO-based varistor**
Roy, S., Roy, T.K., **Das, D.**

- Proceedings of Research Scholars Colloquium 2016** (ISBN: 978-93-80813-44-8), Pages 161-162, 23-24 August, 2016, IEST Shibpur, India.
21. **Segmentation of dual-phase steel micrographs**
Dutta, T., Datta, S., **Das, D.**
Proceedings of Research Scholars Colloquium 2016 (ISBN: 978-93-80813-44-8), Pages 167-168, 23-24 August, 2016, IEST Shibpur, India.
20. **Fabrication of in-situ intermetallic reinforced Aluminum matrix composite**
Pradhan, S.K., Chatterjee, S., Basu Mallick, A., **Das, D.**
Proceedings of Research Scholars Colloquium 2016 (ISBN: 978-93-80813-44-8), Pages 165-166, held on 23-24 August, 2016, IEST Shibpur, India.
19. **Influence of dynamic precipitation during low cycle fatigue of under-aged AA6063 alloy**
Nandy, S., Sekhar, A.P., **Das, D.** Hossain, S.J., Ray, K.K.
Proceedings of the 7th International Conference on Creep, Fatigue and Creep-Fatigue Interaction, 19-22 January 2016, IGCAR, Kalpakkam, India.
18. **Structure and property of sub-zero processed cold work die steel**
Das, D., Dutta, A.K., Ray, K.K.
Proceedings ASME 2013 International Mechanical Engineering Congress and Exposition, ASME, Volume 2A: Advanced Manufacturing, San Diego, California, USA, November 15-21, 2013; ISBN: 978-0-7918-5618-5; Paper No. IMECE2013-63102, pp. V02AT02A038; 2014; 10 pages.
DOI: 10.1115/IMECE2013-63102.
<https://asmedigitalcollection.asme.org/IMECE/proceedings-abstract/IMECE2013/56185/V02AT02A038/288782>
17. **Cryogenic processing to improve wear resistance of die steels**
Das, D., Ray, K.K.
Proceeding of the 16th International Conference on Advances in Materials & Processing Technologies (AMPT2013) on CD-ROM; Sept. 22-26, 2013, Taipei, Taiwan, ROC. Session: 4 (Surface-1); Paper ID: 384; Pages 8.
16. **Estimation of fracture toughness by miniature chevron notch specimens of sub-zero treated tool steel**
Das, D., Ray, K.K., Dutta, A.K.
Proceedings of the Fourth International and Twenty Fifth All India **Manufacturing Technology, Design and Research Conference – 2012 (AIMTDR 2012)**, Jadavpur University, Kolkata, India; **Innovation for Sustainable Manufacturing**, B. Bhattacharyya, S. Chakraborty and B. Doloi (Eds.), Excel India Publishers (ISBN: 978-93-82062-75-2) Volume 1 (2012) Page 162-167.
15. **Effect of different sub-zero treatments on mechanical properties of AISI D2 steel**
Das, D., Dutta, A.K., Ray, K.K.
Proceeding of International Conference on **Advances in Materials and Materials Processing (ICAMMP-2011)**, 9-11 December 2011, IIT-Kharagpur, (2011) 6 pages (in CD-ROM).
14. **Improvement of tribological properties of die steel by sub-zero treatments**
Das, D., Dutta, A.K., Ray, K.K.
Proceeding (in CD-ROM) of 3rd International Conference on **Structure, Processing and Properties of Materials (SPPM2010)**, February 24-26, 2010, Dhaka, Bangladesh; Eds. M. M. Ali Bepari, M. N. Haque, A. K. M. B. Rashid, M. A. Islam and M. Hasan; Technical Session 4A: Tribology, Corrosion and Surface Engineering, Paper no. G02, (2010) 6 pages.
13. **Enhancement of Wear Resistance of AISI D2 Steel by Deep Cryogenic Treatment**
Das, D., Dutta, A.K., Ray, K.K.
Proceedings of the Third International and Twenty Fourth All India Manufacturing Technology, **Design and Research Conference – 2010 (AIMTDR 2010)**, Andhra University, Visakhapatnam,

Andhra Pradesh, India; **Global Trends and Challenges in Design and Manufacturing**, Beela Satyanarayana and Koone Ramji (Eds.), Volume 2, Page 1111-1116.

- 12. Structure-property correlation of cryotreated AISI D2 steel**
Das, D., Dutta, A.K., Ray, K.K.
The JSPS-DST Asia Academic Seminar 2009 on **Advanced Materials for Sustainable Development**, December 8-15, 2009, Yokohama, Japan, pp. 67-68.
- 11. Enhancement of wear resistance of die steel by deep cryogenic treatment**
Das, D., Dutta, A.K., Ray, K.K.
Proceeding (in CD-ROM) of 13th International Conference on **Applied Mechanics and Mechanical Engineering (AMME-13)**, May 27-29, 2008, The Military Technical College Cairo, Egypt; Paper No: MS-14, Abstract: p. 125, (2008) Full text: 13 pages.
- 10. On the mechanism of improvement in wear Resistance of die steel by cryogenic treatment**
Das, D., Dutta, A.K., Ray, K.K.
Proceedings (in CD ROM) of International Conference on **Advances in Manufacturing Technology for Young Engineers (ICAMT 2008)**, Indian National Academy of Engineering (INAE), February 6-8, 2008 Chennai, India; **Technical Session A5: Heat Treatment**; Paper No. C30, (2008) 8 pages.
- 9. Influence of martensite morphology on the deformation behavior of dual-phase steel**
Das, D., Chattopadhyay, P.P.
Proceeding of International Conference on **Microalloyed Steels: Emerging Technology and Applications (Microalloying-2007)**, Eds. D. Bhattacharjee, U.K. Chatterjee, S. Chatterjee, M. Dutta and K.K. Ray, Vitasta Publ. Pvt. Ltd., (2007) pp. 231-239.
- 8. Effect of microstructure on the mechanical properties of high-martensite dual-phase steels**
Banerjee, S., Bandyopadhyay, N.R., Chattopadhyay, P.P., Das, D.
Proceeding of International Conference on **Microalloyed Steels: Emerging Technology and Applications (Microalloying-2007)**, Eds. D. Bhattacharjee, U.K. Chatterjee, S. Chatterjee, M. Dutta and K.K. Ray, Vitasta Publ. Pvt. Ltd., (2007) pp. 384-392.
- 7. The influence of cryogenic treatment on the carbide precipitation and tribological behavior of D2 steel**
Das, D., Dutta, A.K., Toppo, V., Ray, K.K.
Proceeding of International Conference on **Advances in Materials and Materials Processing (ICAMMP-2006)**, Eds.: U.K. Chatterjee and B.K. Dhindaw; IIT-Kharagpur, (2006) pp. 575-582.
- 6. Development of bulk nano-Al₂O₃ dispersed Cu-matrix composite using ball milled precursor**
Das, D., Samanta, A., Chattopadhyay, P.P.
Proceeding of International Conference on **Advances in Materials and Materials Processing (ICAMMP-2006)**, Eds.: U.K. Chatterjee and B.K. Dhindaw; IIT-Kharagpur, (2006) pp. 133-140.
- 5. Mechanical properties of bulk ultrafine-grained copper**
Das, D., Samanta, A., Chattopadhyay, P.P.
Proceedings of International Conference on Nanomaterials (NANO 2005), Ed.: V. Rajendran; (2005) pp. 403-410.
- 4. Deformation behavior of bulk ultrafine grained copper prepared by sub-zero rolling and controlled recrystallization**
Das, D., Samanta, A., Chattopadhyay, P.P.
Proceedings of International conference on **Nanomaterials: Synthesis, Characterization and Application**, Eds.: S. Bandyopadhyay, A. Basumallick, N.R. Bandyopadhyay, S. Seal, H.S. Maiti, S. Dutta, S.P. Sengupta and J. Dutta; Tata-McGraw Hill Publ. (2004) pp. 542 – 546.

3. **Effect of martensite morphology and volume fraction on the mechanical behavior of high-martensite dual-phase steels**
D. Das, D., Chattopadhyay, P.P.
Proceedings of International Conference on **Advances in Materials & Processes for Industrial Applications**, ASM International (2003) pp. 50-58.
2. **A study on the effect of martensite morphology on mechanical properties of high-martensite dual-phase steels**
D. Das, D., Chattopadhyay, P.P., Bandyopadhyay, N.R.
Proceedings of Seminar on **Resurgence of Metallic Materials the Current Scenario**, Eds.: N.R. Bandyopadhyay, T.K. Roy, R.N. Ghosh, D.K. Bhattacharya, S.K. Narang, C.S. Sivaramakrishnan and S. Ghosh (2002) pp. 68-79,
1. **Thermal stability and grain growth behavior of nanocrystalline Cu-10 at.% Fe alloy prepared by mechanical alloying**
Das, D., Pabi, S.K.
Proceedings of International Conference on **Advances in Materials and Materials Processing (ICAMMP-2002)**, Eds.: N. Chakraborti and U.K. Chatterjee; Tata-McGraw Hill Publ. (2002) pp. 391-395.
