About

Dr. Subhra Paul has completed B. Tech in Civil Engineering from Jalpaiguri Govt. Engg. College (2010) and completed M.Tech in Structural dynamics & Earthquake Engineering from Civil Engineering Department, NIT-Silchar (2016). Dr. S. Paul completed his Ph.D. from IIT Guwahati (2022) in Steel structure.

Dr. S. Paul served as a Design Engineer at L&T. He joined as Temporary Faculty in the Department of Civil Engineering at the IEST, Shibpur in January 2023. His primary research interests include Large Scale Experimental Testing of Structures, Steel structures, Concrete Filled Tubular Structures, Lightweight Structures, CFRP Pultruded Profiles, Finite Element Method, and Performance-based seismic design of structures.

Academic qualification

Ph.D. (Steel Structures), Department of Civil Engineering, IIT Guwahati, 2022

M.Tech (Structural dynamics & Earthquake Engineering), Department of Civil Engineering, 2016

B. Tech Department of Civil Engineering, Jalpaiguri Govt.Engg. College 2010

Research Interest

Large-scale experimental testing
Steel structure, Lightweight structures
CFRP Pultruded Profiles, Tubular Structures
Performance-based design, Finite Element Method
