

## Workshop on 'Solar Passive Architecture and Thermal Comfort'

by PMRF scholar Jeslu Celine Jacobs on 17-18 August 2024.

Aimed to provide participants with essential knowledge and hands-on experience in the following areas:

- Passive energy-efficient design strategies, both simple and advanced.
- Climate-responsive design methodologies allowing architects to tailor their designs to specific environmental conditions.
- Utilization of tables, software, and coding languages to develop design strategies and evaluate thermal comfort in architectural projects.
