Ignition Casino impresses with a fantastic selection of games from none other than Realtime Gaming (RTG). The primary reason why the gambling site opted-in for RTG games is due to the careful planning and quality products that the USA software developer supplies to Ignition Casino. It also makes it possible for Americans to enjoy unique storylines, captivating themes, and different pay lines structures and betting options when it comes to slots.

The table games, video poker variants, and specialty games from this popular USA software developer also provide an immersive gaming experience, complete with stunning graphics, exceptional animation quality, and realistic sound effects that will leave you on the edge of your seat with every bet you place. The USA software provider has been around since 1999, making it easy to understand why this casino chose this software developer to provide all the gaming content on the site. One of the most important aspects to any online casino is to ensure there's a decent selection of deposit and withdrawal options available to online players. If you are unable to seamlessly transact on your account, all the other features of the casino can be deemed pointless. Fortunately, Ignition Casino is well-aware of this fact which is why USA gamblers can look forward to loads of funding and withdrawal options for added convenience.

After using a no deposit Ignition Casino bonus you can fund your account using these trusted USA methods.

The smallest withdrawal you can make is \$10.00 while using Bitcoin, Bitcoin Cash, Player Transfer, and a Voucher. However, if you use Check by Courier in the USA, your minimum withdrawal amount is \$100.00. It's also worth mentioning that USA withdrawals can be paid within 15 minutes except for the Check by Courier option that can take up to 15 days.

Here are some of the most frequently asked questions that users at Ignition Casino have.

Since its creation in 2016, the Ignition Casino has gone on to become a complete gambling site that accepts bitcoin payments and offers plenty of games for people from countless countries across the world. However, this website is mainly meant to be visited by European players. Bonuses are also tailor-made for those who live in Europe.

Ignitioncasino

This massive online casino offers a complete experience that many could enjoy, but is it the site for you? Stay with us and learn more about this feature-packed casino, as well as its games, bonuses, and categories, with our complete Ignition Casino review.

The first thing you need to know is that this casino is not available to be visited from many countries. It's possible that you may need a VPN even if you just want to see what the site is about. The site is, however, part of the Bodog Casino Group, so you can find similar casinos that are available in your location if you browse through the group's portfolio.

Ignitioncasino

Notwithstanding, the website is easy to browse; its categories are clear for everyone to pick their favorite games, and the game selection of the casino is there for every other casino operator to be jealous about.

We have to recommend this website to any fan of the classic card game if they're thinking about registering at Ignition. This world-class website includes a fantastic poker app that you can download and play from wherever you wish, as it's fully compatible with the world's most popular smartphones and mobile devices.

Ignitioncasino

You can read a more complete review of this site's poker section if you scroll down a little more. We loved it – we're sure that you will love it, too.

Being able to play poker online is one thing, but partaking in your favorite gambling activities with Bitcoin is precisely what crypto fans will love about this amazing crypto casino. Virtually everything is available to be enjoyed with cryptos on the casino, but bear in mind that this site mostly operates with BTC and not with other popular cryptos.

Ignitioncasino

In any case, those gamblers that love to play with bitcoin will absolutely love it at Ignition. From poker to slots and even live casino games, you'll be able to play if you made a deposit with BTC. It's easy enough – and all you need is a crypto wallet to begin!

RealTime Gaming, Betsoft, and Genesis Gaming are the site's most popular casino game providers. You'll be able to play their slots and table games if you visit the site's gallery, and we're sure that you won't be disappointed by it.

Ignitioncasino

We read some complaints about the casino's game fairness, so we were curious to check out whether they were true or not. We didn't find anything that made us think that Ignition Casino wasn't legit – even when comparing our personal RTP with that of the same games we played at Ignition in other online casinos.

Nevertheless, with some player complaints floating around, we advise you to be careful if you're going to play here. With that out of the way, let's take a look at the types of games that you'll find on the site.

Ignitioncasino

Slots are aplenty at the Ignition Casino. You will have the choice to play new online casino games, as they're constantly being added to the slot section of the casino, or stick to playing industry classics if you wish.

In the slot section, you'll find games made by Real Time Gaming as well as Betsoft. There aren't hundreds of games here as there are in other online casinos, but the selection of slots is quite decent and it's sure to give you enough options to choose a game that suits your needs.

Ignitioncasino

Things start to get more interesting when you browse the table games of the Ignition Casino. This website comes packed with plenty of options to choose from. If you're a fan of poker, you'll be better off to the poker section of the site. But those who love to play blackjack, craps, and baccarat will love this part of the site.

Roulette games are also aplenty, but we recommend you check out the variations of blackjack available at Ignition. We had a lot of fun playing them – and we're sure that you will, too!

Ignitioncasino

There's a section at the Ignition Casino called "Special Games", where you'll find some other types of casino games that are also really fun to play. Keno and Bingo are found in this section of the casino, so there's something even for those that don't like classic casino games and would rather go for something that resembles a lottery.

There are multiple variations of Bingo, amongst which you'll find:

Ignitioncasino

Video Poker is always fun – especially if you don't feel like playing poker against other players and you would rather spend your time in something more resemblant to online slots. Video poker gives you the best of both worlds, combining the thrill of video slot gameplay with the magic of poker.

At the Ignition Casino, you will be able to play eight different variants of this game with an RTP that is very close to 99.5%. You'll need to know about basic video poker strategy to win, but even if you don't you're sure to have fun with the site's 8 different video poker machines.

Ignitioncasino

If you've played poker in sites like PokerStars before, then you're going to find the Ignition software pretty user-friendly. The software is very similar to what we're used to seeing in most online casinos that offer poker, with fast-paced gameplay and good graphics to get you by.

It's not all about standard poker gameplay at the casino. Texas Hold'em tables are just part of the amazing Ignition experience.

Ignitioncasino

You'll be able to claim multiple rewards to earn extra cash playing poker at the casino. Some poker activities could get you thousands of dollars worth of rewards! Among the prizes that you'll claim, there are:

You will also be able to download a poker app if you want to take your gambling with you. The app must be downloaded on the official casino website to make sure that you're not getting a fake one, and you'll have to allow your device to install apps from unknown sources if you want to get it to work.

Ignitioncasino

The Ignition Casino hosts a selection of Virtual Sports games where you can place bets and try your luck to see how well you do in a digital sports environment. These types of games are extremely fun to play and they're sure to reward players with a massive selection of matches to choose from.

Unlike other casinos, Ignition mainly focuses on offering players racing virtual sports. These games range from standard horse racing to greyhound racing events and even camels and color-color races.

Ignitioncasino

When it comes to the site's selection of standard sports games, you can also access the casino's Soccer and Soccer League events. Place your bets on your own digital national team or see which clubs you would rather put your money on. Options are aplenty at Ignition and games are really fun to play.

Just keep in mind that there aren't any bonuses for this section of the casino. You'll have to play with your own cash!

Ignitioncasino

There is a live section of casino games at the Ignition Casino. Here, you will be able to find all sorts of titles and you'll be able to see the name of the dealer currently in charge of each table. Some of the titles found at the Ignition Casino live section are versions of blackjack, which are mostly the main titles that you'll find at the casino.

One thing we found really curious, and something that we really liked, was that all of the games found at the live casino section of the Ignition Casino come with a small message where it says the game's RTP. This is definitely a very good live dealer casino to visit.

Ignitioncasino

Some online casinos host tournaments for their slots or table games, but the Ignition Casino staff takes full advantage of the site's massive poker rooms to host incredible poker tournaments on a daily basis. Tournaments can pack some extremely lucrative rewards, but they can only be enjoyed by those who know how to play poker.

These are the main tournaments that you'll find on the casino:

Ignitioncasino

The site is packed with dozens of bonuses that are sure to make it possible for every player to claim whatever they need, regardless of what they want to play. The Ignition Casino also provides gamblers with bonuses in both bitcoin and FIAT currencies, which makes it possible for players to claim rewards in any currency that they choose.

However, there are a couple of main bonuses that allow newcomers to get their accounts loaded with a bunch of bonus money.

Ignitioncasino

The standard Ignition Casino welcome bonus didn't use to be as good as it is today. You can now claim a single, massive welcome bonus that rewards players with a staggering sum of up to \$3,000 in free bonus cash. Back in the day, you could only use the welcome bonus money for the casino. Now, the site keeps it divided for people to truly enjoy a fantastic experience in the casino.

Bitcoin bonuses are aplenty at the site. You can choose the standard Bitcoin welcome bonus if you would rather spend your bitcoin and not real cash. You can claim up to \$1,000, or its equivalent in BTC, if you make a deposit in bitcoin to begin your Ignition journey.

Ignitioncasino

You will also be able to use the money to collect Ignition Miles, which are the bonus points that you obtain to then claim rewards on the site's loyalty program.

Ignition Casino bonuses look extremely lucrative at first glance. We were also partially deceived by it during our first visit to the casino. However, paying a quick read to the bonus terms will have you know that even bonuses with a 150% match deposit come packed with a wagering requirement of 25 times the amount of money earned with the bonus and your deposit.

Ignitioncasino

The caveat is that you will have to use your own bonus money to fulfill the terms, so you would need to wager the money 25 times but you're still unlikely to make any winnings from it unless you're extremely lucky. Keep that in mind before claiming any bonus in the Ignition Casino.

The entire Ignition Casino rewards program revolves around the collection of Ignition Miles, which is the name given to the loyalty points that players get in this online casino. There are some bonuses that players can claim depending on their rank, but this is how the program's point system works:

Ignitioncasino
